

KR708

RESTRICTED ACCESS PILING RIG

The Klemm KR708 is a multi-purpose drilling rig covering all drilling systems. There are a series of options that provide the optimum rig configurations for a particular drilling process depending on the requirements. The on-board power pack allows the rig to achieve great manoeuvrability on sites with restricted access. With a Perkins 1004-40TW 91kw engine it is a powerful rig for its size. The 708 is smaller than its sister rig, the Klemm KR709, with an overall weight of 8 tonnes.

Track length	5200mm
Rear overhang	1000mm
Mast height	5200mm
Track width	2000mm
Transport height	2900mm
Transport weight	8200kg
Max. pile depth	20m
Pile diameter range	300mm - 600mm
Rotary torque	35 kN
Crowd force	38 kN
