

T15000

RESTRICTED ACCESS PILING RIG

The T15000 Piling Rig comprises a 1.7 tonne drill that is mounted on rubber crawler tracks. It's designed to be capable of working within confined, restricted or limited access locations and its minimum operating dimensions — 720mm wide by 2250mm high — ensures it can easily be manoeuvred through a standard household doorway. The T15000 piling rig comes with a super silenced 44kW 'whisper' power pack that can easily be detached and used up to 50.0 meters away from the piling platform.

Height when drilling	2400mm
Transport height	1700mm
Minimum width	720mm
Maximum width	1020mm
Length	1800mm
Weight	2500kg
Mast length	2200mm
Max torque	1500Nm
Towable power-pack weight	1250kg
Power-pack width	1400mm
Power-pack height	1400mm
Power-pack length	2800mm
